
a
Station-level association
Delfzijl
Lowestoft
Newport
Connected share of represented land (%)
COAST-RP 10-year storm tide (m)
b
Spatial-block resampling at three target scales
100 km blocks
150 km blocks
250 km blocks
Connected land share
Below-2 m land share
Conditional connection
Connected area
Spearman correlation
c
Observed top-set overlap remains within spatial null envelopes
100 km null
150 km null
250 km null
Observed
Number of shared stations
Top-set size (% of stations)
d
Terrain priority changes across prespecified configurations
Sheerness
Delfzijl
Hoek van Holland
Avonmouth
neither top20
water priority only
terrain priority only
dual priority
Terrain top-20% selection frequency
Storm-tide priority rank (1 = highest)
