

■ Ocean-connected water seed
 ■ Unconnected land below 2 m
 ■ Lake/non-tidal water
■ Connected land below 2 m
■ Other represented land

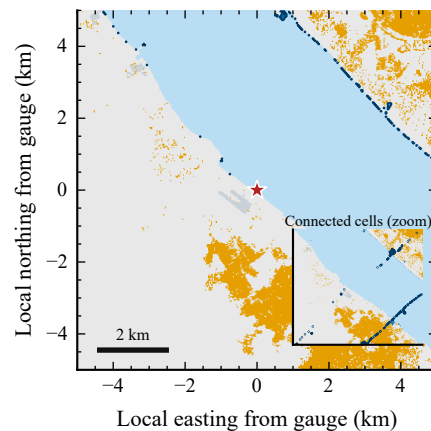

a. Delfzijl
Stable terrain-priority case

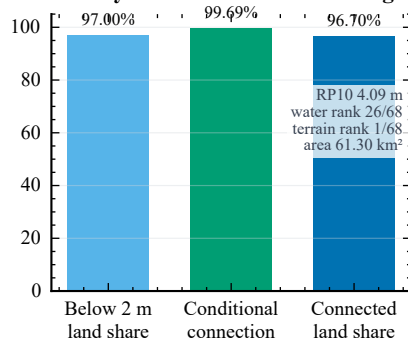

b. Newport
Water-priority, lowland-limited case

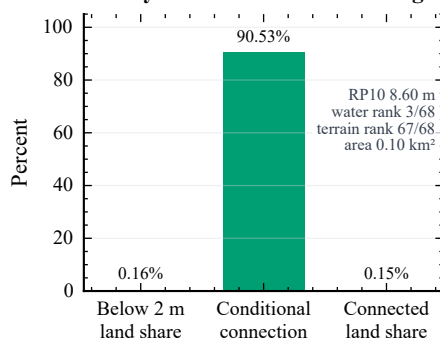

c. Immingham
Connectivity-filtered case

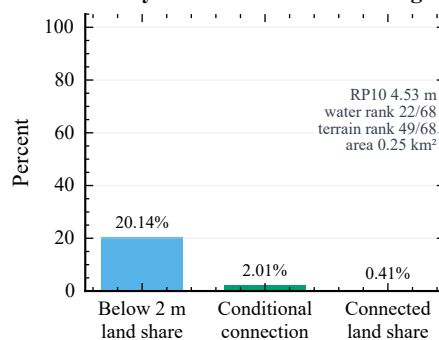

d. Why the connected share is high or low

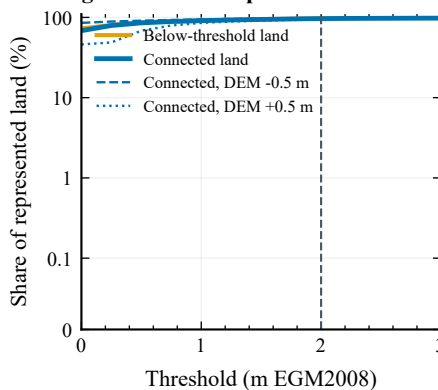

e. Why the connected share is high or low

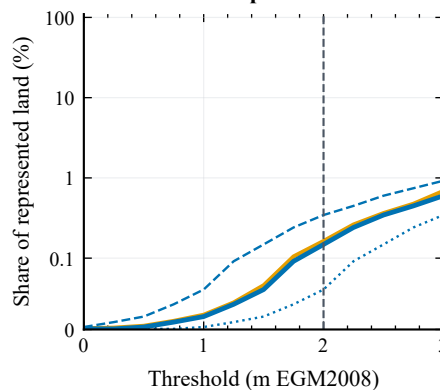

f. Why the connected share is high or low

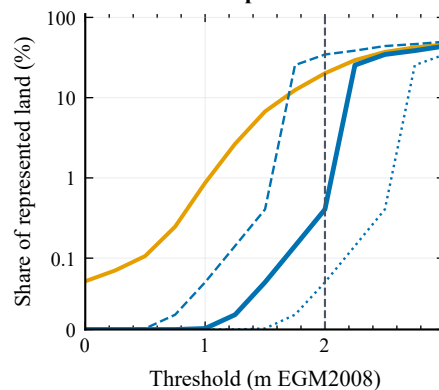

g. Threshold response

h. Threshold response

i. Threshold response

Thresholds are standardized terrain elevations in EGM2008, not event-specific flood water levels.
